**Designed for anticipated or unanticipated  
difficult airway situations and for  
cardiopulmonary resuscitation, the  
LMA Fastrach™ facilitates continuous  
ventilation and intubation, lessening  
the likelihood of desaturation.**

## The Ventilating, Intubating LMA™

The can't intubate/can't ventilate situation is among the most feared and respected challenges in airway management. With precious few seconds available to choose a backup airway device, the decision is a critical one. That's why LMA Fastrach™ is the undisputed choice of medical professionals in more than 35 countries for the difficult airway.

- Simple, fast insertion technique to achieve ventilation
- Allows ventilation between intubation attempts
- High intubation success rate both blind and fiberoptic assisted
- Supplied ready to use
- Ideal for both hospital and pre-hospital use
- 8 year track record - thousands of successful uses
